Portfolio: [Link](#)

Profile

Computer Science and Engineering (Data Science) student with a strong foundation in software development, Java, Python, and JavaScript. Experience in building scalable backend systems using the MERN stack and REST APIs. Built production style AI powered applications using Large Language Models (LLMs), RAG pipelines, LangGraph, vector databases, and LLMs. Cognizant Technoverse 2026 Top 5 Finalist.

Education

KIT's College of Engineering Kolhapur (Empowered Autonomous)

2023 - 2027

B.Tech Computer Science and Engineering (Data Science)

CGPA: 8.96/10.0

Projects

Sanjeevani: Healthcare Interoperability Platform

May 2026

- Built a consent based FHIR R4 patient record sharing platform using FastAPI, LangGraph, AWS (Bedrock, S3, DynamoDB, OpenSearch) and GraphRAG using Neo4j, with RBAC and JWT authentication, addressing fragmented EHR systems.
- LangGraph multi node pipeline: entity extraction → Neo4j Knowledge Graph + OpenSearch vectors → hybrid RAG → HITL validation → FHIR bundles.
- HIPAA enforced via PHI redaction (AWS Bedrock Guardrails) and Human in the Loop to prevent hallucinations.
- Hybrid retrieval (graph + semantic search) delivers clinical summaries in <3s.
- [GitHub Repository](#)

Campus Mind: Multi-Tenant SaaS Platform | *FastAPI, PostgreSQL, Pinecone, AWS, React.js*

Jan 2026

- Transformed a single-college RAG chatbot into a multi tenant platform with complete data isolation across database (PostgreSQL), vector search (Pinecone) and file storage (S3).
- Designed and deployed AWS infrastructure (RDS, S3, EC2, ElastiCache, CloudFront) with auto-scaling.
- Implemented RBAC with JWT authentication.
- Reduced student support response time from 24+ hours to under 2 minutes, improving user satisfaction and enabling 24/7 availability across institutions.
- [GitHub Repository](#)

Department Connect: College Management Web Application | *Node.js, MongoDB, Passport.js*

Sep 2025

- Developed a full-stack departmental portal for colleges enabling HODs, Faculty and Students to manage announcements, documents and leave requests through role-specific dashboards.
- Implemented RBAC system, Passport.js for session authentication, route-level authorization middleware.
- [GitHub Repository](#)

Technical Skills

Languages: Java, Python, JavaScript, SQL, C

AI & LLM: LangChain, LangGraph, LangSmith, RAG Pipelines, Prompt Engineering, N8N, HuggingFace

Web & Backend: REST APIs, Node.js, Express.js, React.js, FastAPI

Databases: MongoDB, MySQL, Neo4j

Tools: Git, GitHub, Postman, GitHub Copilot, Cursor, Claude Code

Cloud(AWS): EC2, S3, RDS, IAM, Bedrock, CloudFront, ElastiCache

DSA: Solved 350+ problems on LeetCode [Link](#)

Relevant Coursework: DSA, DBMS, ML, NLP, Deep Learning, Software Engineering

Achievements

Secured a place in Top 5 out of 5000+ teams at the Cognizant Technoverse Hackathon

May 2026

TSEC Need For Code 4.0: Winner (70+ teams), TSEC Mumbai

Aug 2025

Sinhgad Hackathon 2025: Runner-Up (50+ teams), SKN COE Pandharpur

Mar 2025
